

# Roulette Best Winning System !!!

**99.7% winning system - 100% risk free – Guaranteed**

The roulette playing system detailed here is a well-known winning system.

Many people have made a fortune out of this system, including myself.

The reason why people lose at casino is because they play instinctively. But if instead you play using a system, you will increase your chances of winning and be able to beat the casino. Professional gamblers have always been relying on playing systems to win at casinos and make a living out of it.

The system detailed here is used by 95% of the professional gamblers, you can make \$500 in only 30 min with it - EASY !!!

All you need to do is follow the instructions set in this document and you will start to generate hundreds of dollars daily.

## Step 1 : Choose your online casino

You can always use this system in real casinos but I prefer to go to online casinos because you can spin the wheel as soon as you place your bet.

One of the online casinos I particularly like is Las Vegas USA Casino. It's one of the largest online casinos in the world so you will never have any problem getting the money you win. And best of all, you can play up to \$500 without risking any of your own money, you will see how in the next step.

For now, you need to download and install the casino software :

[click here to download the casino software](#)

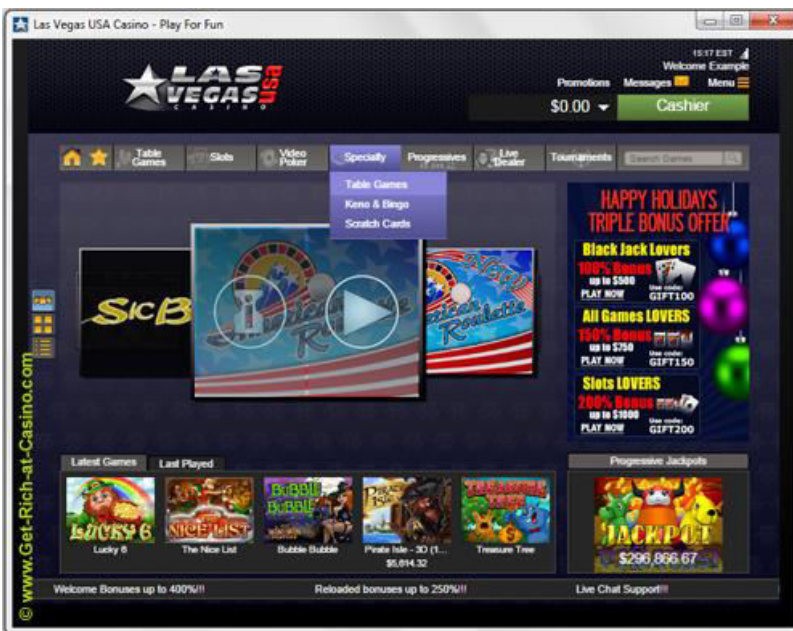

After you have installed the casino software, **launch** it.

A message asking if you would like to create an account will appear, click **"Yes"** - Fill in your information and click **"Create"**

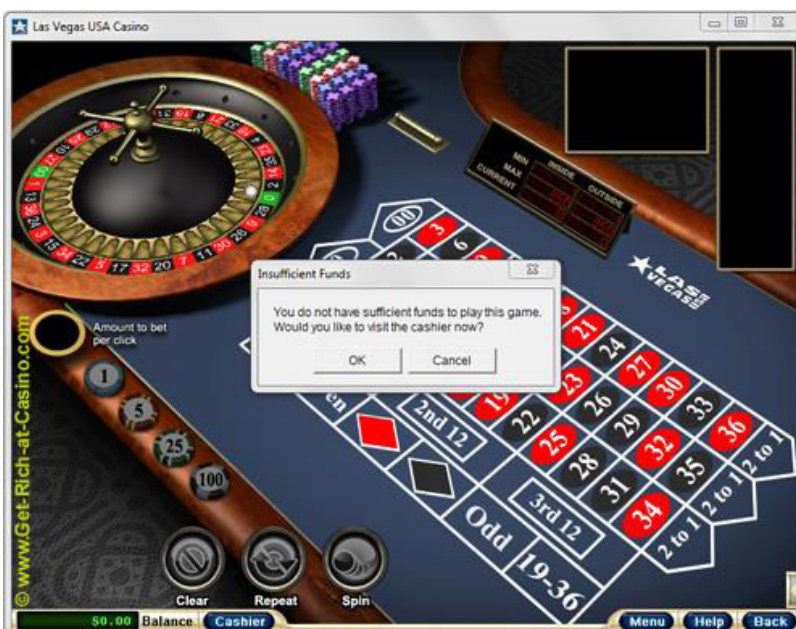

You can now log into your account with your **Login Details**, select "**Play For Money**" and click "**Login**"

Don't stress too much about playing for money, you can play without risking any of your money, you will see how in the next step.

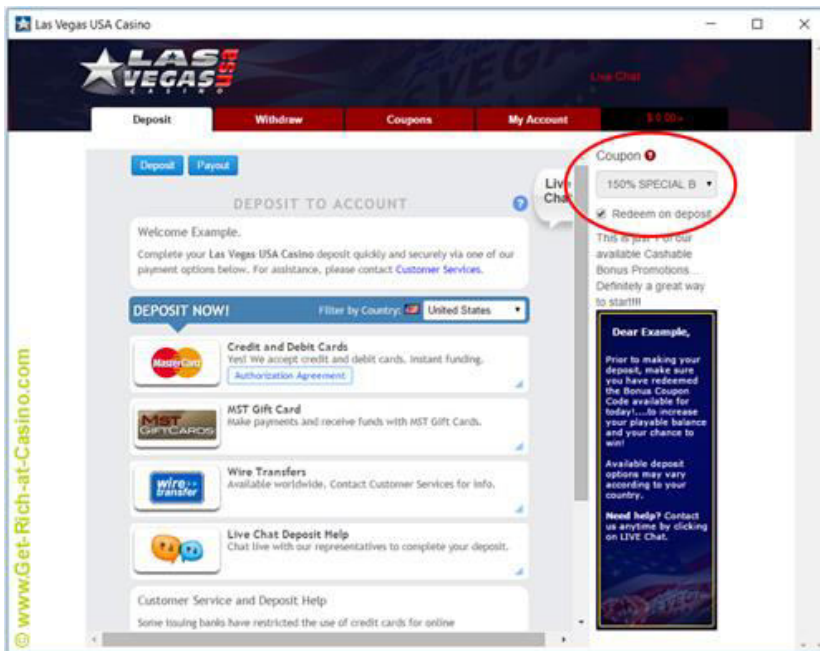

Under the drop down menu item "**Specialty**" (highlighted in purple), click on "**Table Games**" (1<sup>st</sup> item from the top).

Then click on the **Play** button on the "**American Roulette**" picture

A message asking if you would like to visit the cashier will appear, click "**OK**"

Here is the best part. As a new user, you will get a welcome bonus of 150% on your initial deposit. **That means you can play with the bonus money without risking your own money.**

In the Coupon section on the right hand side, select **"150% SPECIAL B"** (circled in red), tick the box **"Redeem on deposit"**

Choose from a large selection of payment methods : Visa, MasterCard, AmericanExpress, MST Gift Card, Wire Transfer and proceed to the **deposit**

You want to deposit as much money as you can so you get as much bonus money as possible to play with so you don't risk playing any of your own money.

A good start will be to deposit \$250, you will get a total of \$375 with the bonus money, that's \$125 you can play without risking your own money. If you don't have that money, try to put \$200, you will get \$100 bonus money that you can play without risking your money. If you can afford more, do not hesitate, you will have more of bonus money to play without risking your own money. You can always withdraw your money later.

Once you have deposited funds into your account, click on **"EXIT"**

Now that you have set up your account and have money to play with, it's time to turn it into more cash !!!

## Step 2 : It's time to make some real money !!!

So now here is the fun part, it's time to play and make some real money !!!

Let's have a closer look at the playing system, this system bets only on "Dozens" (High, Middle or Low), illustrated bellow :

This is a bet in the **LOW** section, you win for any number between **1-12** that comes up.

This is a bet in the **MIDDLE** section, you win for any number between **13-24** that comes up.

This is a bet in the **HIGH** section, you win for any number between **25-36** that comes up.

Betting on the "Dozens" will give you 1 in 3 chance of winning, more than betting on a single number (1 in 36 chance of winning). But that's not good enough, the risk of losing is still too high. Using the system exposed below will dramatically increase your chances of winning.

What you are looking for is a sequence of numbers where the Low or the Middle or the High section has not come up for 5 spins.

You can keep a record of the numbers that have come up in a table :

	Low Section	Middle Section	High Section
1		X	
2	X		
...	...	...	...
126			X

Wait until a section has not come up for 5 spins then you bet on that section. Doing that will increase your chances of winning, in the law of averages, the odds of one section not to come up for 6 spins are 1/40.

Followed is the table of bets you should follow to make your bets :

You start your bet at \$1 and then you move to the next row (bet at \$2) until you reach the end of the table and start again from the beginning.

Bet Number	Your Stake	Your Winnings
1	\$1	\$3
2	\$2	\$6
3	\$3	\$9
4	\$4	\$12
5	\$6	\$18
6	\$9	\$27
7	\$13	\$39
8	\$20	\$60
9	\$30	\$90
10	\$45	\$135
11	\$67	\$201

To place your bet, **click on the chips** until you get to the total amount you want to bet ("**Amount to bet per click**"), then **click on the LOW, MIDDLE or HIGH section** you want to place your bet on, then click on "**SPIN**".

Don't worry if you lose a bet, just move to the next row of the table, you will always get your money back and make a profit as long as you increase your bet. You can lose up to 10 times, you will get the money back on the next bet. The odds of one section not showing up for 16 spins in a row is 1/86,500 so don't stress too much if you lose one bet.

For example, if you start with \$200 and bet \$1 and lose, you now have \$199. You move to the next row of the table and bet \$2, so you now have \$197 (\$199-\$2). If this time you win you get \$6, so you now have a total of \$203 (\$197+\$6). You got your money back and made some profits even if you lost the bet before. You will always get your money back and make a profit as long you as you increase your bet.

Below are screenshots taken when starting, after 30min of playing and after 2h30 of playing.

I started with \$375 in my account. If you put \$250 funds in your account, you will get \$125 welcome bonus money that will make a total of \$375. You should take advantage of this promotion, it's only available on your first deposit.

Starting with \$375 in my account :

After an hour of playing, I just won \$60 from my bet of \$30 on the Low Section.

The Low Section didn't come up for 6 spins : 31 - 14 - 19 - 20 - 34 - 24, until the number 12 came up.

I have now reached a total of \$1,453, minus the \$375 I started with, that's more than \$1,000 I made in only 1 hour !!!

After 2 hours of playing, I have reached a total of \$2,604. It's time for me to leave the casino and come back another day for some more fun !!!

Have fun and make good use of this system, you can make \$500 in only 30min with it - EASY !!!

It's a life changing opportunity, you can make a living out of it.

It's really simple, just give it a try !!!

You can always withdraw your money at any time if you don't feel like it anymore.

Here is a quick summary on the steps to follow :
